Approve of a set of rules

7898

App. F. III—2]

General and Revenue Secretariat.

Govt. File No. 109 of 1929.

Serial No. 1

From the Chief Inspector of Mines / Director of Geology. No. 1604 d. 11/12.3.30. Submit for the consideration of Govt a set of rules applicable to small mines worked on the open-cast system or by other methods and state that these rules have been framed following a comparative study of the rules obtaining in British India and other mining countries to suit local conditions & that the compilation of a separate set of rules has become necessary as the provisions of the rules framed under the Mysore Mines Regulation IV of 1906 now in force are somewhat elaborate and not easily applicable to them.

Submitted for orders with the connected file.

MV. 11.4.30.

Please see the Mysore Mines Regn. Should not these rules be published for general information before being finally passed.

CC 22.4.30

Submitted with a copy of the Mysore Mines Regulation (No. IV of 1906). Kind attention invited to Rule 41 of the Regulation. It seems necessary to publish the Rules in the gazette beforehand for inviting objections if any from the public.

MV.

NOTE—Contn. sheet.

General and Revenue Secretariat | Genl File No. 109 of 1929

Serial No.

The rules may be published in the Gazette as required by S. 41 of the Legislative Assembly.

2/5/30

I have supplied some minor alterations (in pencil) in the draft rules. The draft may be published.

Please note these (with reference to the rules in the draft) on a separate slip of paper.

I shd like these rules to be examined in relation to the existing rules, to see what overlapping of provisions would result from publishing these in their present form. It would be necessary to frame these rules, & arrange them in such a way that may fit in with the other set of rules, and supplement without duplication them.

W.H.
5/5/30

A comparative statement showing the similarity or difference between the existing rules and the draft rules now proposed for small mines is put up and file with the proceedings.

1 The draft rules framed by the Director of Geology and the Chief Inspector of Mines and proposed to be made applicable to small mines is a discriminate selection of such of the Rules finding mention in Govt. Notification No.444 of 22nd Aug. 1911 as can be made applicable to "small mines So far as the assembling of these rules go, they seem to be eminently practical and sufficient for the needs of the "small mines"

2 I invite kind reference to Rule 36 of the draft Rules under the heading X General. It is provided therein that whenever the vertical depth of a small mine exceeds 150 feet or whenever the Chief Inspector of Mines considers these rules inadequate to meet the conditions of the mine, the Government may, by notification, bring the small mine under the operation of the General Rules of 1911. This provision does not appear to be necessary, as when the depth of mine exceeds 150 feet, it ipso facto follows that the General Rules of 1911 begin to operate. The General Rules of 1911 are applicable to all mines, big or small, as they are framed under the Mysore Mines Regulation which extends to the whole of Mysore. If the small mines are to be brought under the application of the Special Rules now proposed, a provision has to be made in the present rules to the effect that these general rules do not apply to small mines. In

In the absence of such specific provision, the small mines will be subject to double sets of - rules.

In these circumstances, the Director of Geology and the Chief Inspector of Mines may be requested to consider these aspects and effect necessary revisions. The file may perhaps be referred to them unofficially.

Rule 24. What are the returns and where are their forms prescribed? These rules should be complete so far as Small mines are concerned and of the intention is to require the same returns as are prescribed for big mines this point has to be made clear. If however simpler forms will do, what returns & in what form the Small Mines should submit them has to be mentioned in these rules.

Rules 34 & 35 Acts or omissions referred to in these rules are declared to be "breaches of these rules" Where are penalties for these breaches prescribed?

Rule 36. The portion "Whenever the Vertical depths of a Small Mine exceeds 150 ft or" may be omitted. This is unnecessary in view of the definition of a Small Mine. The other General rules apply to big mines & this point has to be mentioned in them.

For 'Such' in line four substitute 'a Small' and delete words 'then existing' in the same line.

Rule 37. Insert "Where working is commenced inspite by an officer of the Geological Dept" between "Mine" and "shall" line 7

Serial No. 36

With respect to the 1st Member's remarks on the last page it is noted as follows:—

1. Rule 24. As regards returns Kind regret is invited to Section 37 of the Mines Regulations & Rule 181 of the Rules issued thereunder under Sections 23 & 33 wherein it is stated that "The Govt may frame rules requiring the delivery of periodical returns of work done, workmen employed, the outturn from the mine of minerals & mineral ores, and such other information as the Govt may think fit to demand, etc", and "The Supdt of a mine shall furnish to the Chief Inspector of Mines a statement showing the quantities of ore obtained & treated, the quantity of metal or other finished products obtained & other returns & statistics in such forms & at such time as may be prescribed by Govt". It is not known however what exactly the returns are & in what form they have been prescribed by Govt. As this information is not available in this office, the same will be got, if approved, from the Chief Inspector.

2. Rules 34 & 35. Penalties for breaches of rules prescribed under Section 21 of the Regn are laid down in Sections 24, 39 & 44 of the Regn and also in Rules 216, 219 & 221 prescribed under the Regulation.

3. Rule 36. This Rule will be modified as ordered by the Member.

4. Rule 37. The necessary insertion will be made in

Final Note by the First Member of Council. 16

Subject:—

Rules for small Mines.

These papers relate to the framing of a set of simple rules for the working of small mines. The existing rules under the Mining Law are intended to regulate the working of large and deep mines like the Kolar Gold Mines and prescribe elaborate conditions which cannot be followed in the case of small mines. The Chief Inspector of Mines and the Director of Geology have submitted a set of rules for being enforced in the case of small mines. These rules were published in the Gazette for objections or suggestions, if any, and no opinion has been received so far. It is now proposed to sanction these rules. The Dewan and the Second Member of Council have agreed to this proposal and it may be graciously sanctioned.

GENERAL AND REVENUE DEPARTMENTS.

G. O. No. D. 6630-31—Geol. 109-29-7, dated 23rd—28th June 1932.

Small Mines,

Issues special rules under the Mysore Mines Regulation (IV of 1906) to prevent accidents in ——

READ—

Letter No. 1604, dated 12th March 1930, from the Director of Geology and the Chief Inspector of Mines, submitting for the consideration of Government, a set of rules applicable to small mines worked on the open cast system or by other methods and stating that these rules have been framed following a comparative study of the rules obtaining in British India and other Mining Countries so as to suit local conditions and to meet practical difficulties and that the compilation of a separate set of rules has become necessary as the provisions of the rules framed under the Mysore Mines Regulation, IV of 1906 are somewhat elaborate and not applicable to small mines.

2. Correspondence ending with letter No. 1782, dated 29th March 1932, from the Chief Inspector of Mines, furnishing his views on certain points.

ORDER NO. D. 6630-31—GEOL. 109-29-7, DATED BANGALORE, THE 23RD—28TH JUNE 1932.

Government are pleased to approve of the set of special rules framed for small mines by the Director of Geology and the Chief Inspector of Mines with a view to prevent mining accidents and ensure the safety of persons employed in or about the mines and to direct that they be published in the *Mysore Gazette*. A separate Notification will be issued in this behalf.

2. The General Rules published under General Notification No. Geol. 444, dated 22nd August 1911, will in future apply only to Mines other than small mines to which the Special Rules now proposed will be applicable.

Secretary to Government,
Development Department.

To—The Chief Inspector of Mines in Mysore.
The Director of Geology in Mysore.

Exd.—P.S.R.N.

No. D. 6630-31—Geol. 109-29-7, dated 23rd—28th June 1932.

ANNEXURE.

Special Rules prescribed under Sections 21 and 37 of the Mysore Mines Regulation (IV of 1906) for Small Mines.

I. Definitions.

1. (1) "Small Mine" means any working which does not exceed at any place a vertical depth of 150 feet below the level of the pit's mouth.

(2) "Manager" means the owner if he is himself on the spot in control of operations or the person who is the local representative of the owner.

II. Safety of workings.

2. The sides of open-workings shall be sloped, stepped or secured in such a manner as to prevent danger from falls of material.

3. When an open-working is worked in steps, the steps shall be of sufficient breadth compared with their height to secure safety.

4. In open-workings, trees liable to fall, the over-burden and all loose ground and material shall be removed sufficiently far from the edge, or otherwise made secure, in order to prevent danger to persons employed in the mine.

5. When any trench or other excavation more than 10 feet deep made in the course of mining operations is or has been abandoned or the working thereof discontinued, at whatever time the abandonment or discontinuance occurs or may have occurred, the Owner or Manager shall without delay either fill up such trench or other excavation, or protect the same by a substantial stone barrier on all sides at least 3 feet 6 inches high and 2 feet thick;

Provided that this rule may be relaxed with the consent of the Chief Inspector of Mines in the case of an open-working of which no side has a steeper slope than 45° and which in the Chief Inspector's opinion is not dangerous.

6. In digging prospecting and other trenches, pits or other excavations, a sufficient quantity of the removed ground shall be so disposed around the limiting boundaries of the opening that approximately equal ridges are provided on these boundaries and all necessary precautions shall also be taken (either by filling up or fencing the same) to prevent persons from inadvertently falling into or entering such trenches, pits or other excavations.

7. When any side of an excavation or open-working, or portion thereof, which exceeds 10 feet in depth, has a slope which is steeper than 45°, the top of such side shall be protected by a suitable fence or barrier to prevent persons from inadvertently falling into or entering the same.

8. Entrance to, or working in, any portion of an open-working, which is considered to be dangerous, is prohibited, and access thereto shall be prevented as far as possible by efficient barriers.

9. In an open-face working, no undercutting shall be allowed and no vertical face shall have a height of more than ten feet but such open-face shall be worked in terraces or at an angle of safety. All debris and other loose matter or stones on the surface, shall be cleared to a distance of at least ten feet from the edge of such open-working.

10. Any place in or about an excavation which is dangerous, shall be made safe or shall be kept securely fenced. Should any doubt arise as to whether a place is dangerous or not, the opinion of the Chief Inspector of Mines shall be conclusive on the point.

III. Management.

11. The Owner of a mine may appoint a competent person to be Manager of the mine. If any question arises about the competency of a person to perform the duties of Manager, the decision of the Chief Inspector of Mines shall be final.

12. A person may be appointed Manager of more mines than one provided that the mines are not so large and the distances between them are not so great, as to render it improbable in the opinion of the Chief Inspector that a single Manager would be able to manage them all efficiently. The decision of the Chief Inspector of Mines shall be final on any question arising out of this rule.

13. Where on account of absence or for any other reason the Manager is unable to perform the duties required of him by the rules, the Owner shall authorise in writing, a person whom he considers competent to act as Manager of the mine ;

Provided that—

(*a*) no such authority shall have effect for a longer period than one month ;

(*b*) the Owner shall send to the Chief Inspector of Mines, with the least possible delay, a written notice intimating that such an authorisation has been made and stating the reason for the authorisation, the qualifications and experience of the person authorised and the dates of the commencement and ending of the authorisation.

14. The Owner or Manager shall—

(1) take all reasonable measures to enforce the requirements of these rules and to ensure that they are observed by every person employed on the mine ;

(2) appoint such persons as may be necessary to assist him in enforcing such observance of the rules ;

(3) provide for the safety and proper discipline of the men employed on the mine ; and

(4) see that all inspections and reports required by the rules are regularly and faithfully made and recorded by the respective officers and competent persons appointed for the purpose.

IV. Workmen.

15. No boys under the age of 12 years and no women shall be employed in the underground workings of a mine.

16. Every person in charge of a working party shall, before commencing work and during the course of it, especially after blasting, make a careful examination of his working place and remove any loose rock, stones or ground which might be dangerous.

V. Explosives.

17. The storage of explosives and the use thereof shall be governed by the rules prescribed under the Mysore Explosives Regulation, II of 1888 and of the Mysore Mines Regulation, IV of 1906.

VI. Accidents.

18. Whenever an accident occurs at a mine which results in the death of, or serious injury to, any person, the Owner or Manager shall at once send notice thereof in writing to the Chief Inspector of Mines, stating fully all particulars regarding such accident in accordance with Form I appended to these rules. The notice shall be accompanied or followed if possible by a certificate from the Medical Officer regarding the nature of injury or cause of death. In cases of death, intimation shall also be sent to the Chief Inspector of Mines by telegraph.

19. By serious injury is meant an injury which results or is likely to result, in total or partial loss of, or permanent damage to, any limb or organ, fracture of any of the larger bones (including the bones of the skull), dislocation of the hip or knee, great loss of blood, internal bleeding or prolonged unconsciousness, or enforced absence from work for 20 days, or which may be declared to be serious by any Medical Officer.

20. If death results from the effects of accident, whether such death occurs at the time of the accident or subsequently, the Owner or the Manager shall send notice of the same forthwith to the nearest Magistrate or Police Officer as well as to the Chief Inspector of Mines.

21. The place where an accident involving the death of, or serious injury to, any person has occurred shall be left untouched after removal of the injured person or persons until it has been examined by an Inspector of Mines or until the expiry of forty-eight hours, unless the stoppage of work at that place would seriously impede the work of the rest of the mine or unless the consent of the Inspector of Mines to the resumption of work has been obtained.

22. In the event of an Inspector of Mines being unable to proceed to the scene of the accident himself, he shall, if he considers an enquiry to be necessary, inform the nearest Magistrate who shall thereupon cause an investigation to be made on the spot into the cause of the accident. A copy of the evidence taken at such investigation shall be forwarded to the Chief Inspector of Mines.

23. In all cases of accident, the Owner or Manager shall arrange for medical assistance to be rendered to the injured as speedily as possible.

VII. Government Returns and Inspections.

24. The Owner or Manager of a mine shall furnish to the Chief Inspector of Mines a monthly statement showing the quantities of ore obtained and treated or the quantity of metal or finished products obtained, or ore exported or utilised and other returns and statistics in such form and at such time as may be prescribed by him so as to reach the Office of the Chief Inspector of Mines not later than the 15th of each subsequent month.

25. When any working is commenced for the purpose of opening a mine, or the working of a mine has been temporarily or permanently discontinued or abandoned, or where the working of a mine is recommended after any such discontinuance or abandonment, the Owner or Manager shall immediately give written notice thereof to the Chief Inspector of Mines.

26. When the working of any mine is discontinued or abandoned, the Owner or Manager of such mine at the time of its discontinuance or abandonment shall continue to be responsible for compliance with the requirements of the rules so far as the protection of the surface and the furnishing of plans and returns are concerned until the Chief Inspector of Mines shall have issued to him a certificate that such requirements have been complied with.

27. The Chief Inspector of Mines or his authorised representative shall at all reasonable times have access to the plans and sections of the mines in order to examine and inspect them, take copies thereof and make extracts therefrom; and shall be entitled to enter upon any part of the mine and inspect and examine the state and condition thereof and the mode in which operations are carried on and hold enquiries as to accidents, but so far as possible in such a manner as not to impede or obstruct the working of the mine, and the Owner or Manager shall assist in the conduct of every such inspection or examination affording all information required therefor and producing any books or records required to be maintained under these rules.

VIII. Plans.

28. The Owner or Manager shall keep in the office at the mine an accurate, up-to-date general plan of the workings on a suitable scale. Detailed working plans and sections of individual excavations drawn on larger scale should also be maintained.

29. A true copy on mounted paper or tracing cloth of the plans and sections referred to above shall be deposited with the Chief Inspector of Mines, and the said copies shall be brought up-to-date once every six months by the Owner or Manager.

IX. Miscellaneous.

30. The working of the mine shall be under the general control and responsibility of the Owner or the Manager.

31. No person shall be allowed to enter a mine in an intoxicated condition or if known to be subject to any complaint which might place his life in danger.

32. No person working in or about a mine shall sleep whilst on duty.

33. Every person shall strictly comply with all lawful orders issued by the Owner, Manager or such other official as may be empowered by the Manager to issue the same.

34. If any person employed in a mine shall, by any act or omission wilfully or negligently do anything which may allow or facilitate injury to, loss, destruction or theft of any property employed in or produced in the course of mining operations, he will be deemed to commit a breach of these rules.

35. Any person employed in or about the mine who shall, by any act or omission, wilfully or negligently do anything likely to endanger life, or shall wilfully or in a careless or thoughtless manner expose himself to danger, will be deemed to be guilty of a breach of these rules.

X. General.

36. Whenever the Chief Inspector of Mines considers these rules inadequate to meet the conditions of a small mine, the Government may, by notification, bring the small mine under the operation of the general rules prescribed under the Mysore Mines Regulation, IV of 1906.

No D. 6530-31 -Geol. 199-29-7, dated 23rd—28th June 1932.

37. Officers of the Mysore Geological Department during the course of their inspection of any mine should not overlook defects in the working of such mine amounting to a breach of these rules more especially in respect of the safety of the persons employed therein with a view to prevent accidents. All work in that part of the mine where working is considered unsafe by an Officer of the Geological Department should be stopped at once and the matter reported to the Chief Inspector of Mines without delay for necessary action.

38 All workmen shall strictly adhere to these rules and to any directions issued by the Owner or Manager with a view to their safety or proper convenience of the mine, not being inconsistent with these rules.

39. If any mine is worked in a manner which, though not expressly forbidden by the provisions of these rules, is nevertheless dangerous, the Chief Inspector of Mines may require the matter to be remedied and failure on the part of the Owner or Manager of such Mine to comply with such requisition will amount to a breach of these rules.

Accident No.
Year 193

RULES UNDER THE MYSORE MINES REGULATION, IV OF 1906.

Report of Accident (1).

Name of Mine.
Date of Accident.
Time of Accident (5).
Class of Accident (2).
Place of Accident (3), (4).

Names of persons killed	Age	(6) Occupation	Hours worked before accident	Nature of injury causing death and date of death

Names of persons injured	Age	(6) Occupation	Hours worked before accident	Nature of injury

(*a*) How the accident happened.

(*b*) Whether the work was being carried on by a contractor or by the Company (or mine owner).

(*c*) Name and Certificate number of Contractor.

(*d*) Name and Certificate number of Mestri, Blaster, Engine-Driver of workman in charge and if present.

(*e*) Name of Foreman or other official in charge of the safety of the part of the mine where the accident happened.

(*f*) Name and designation of Mining Officer in charge of that part of the mine.

Dated *193*

....

Superintendent.

No. D. 6630-31—Geol. 109-29-7, dated 23rd—28th June 1932.

Explanations.

(1) Notices of all accidents as required by Rules 18, 19 and 20 must be furnished on the above form.

(2) Insert numbers corresponding to the following classes:—

1.	Falls in mine	.. Falls of hanging wall.	
2.	Falls in mine	.. Falls of sides or roof.	
3.	Falls in mine	.. Falls of ore from working places.	
4.	In and at Shafts	.. Over winding.	Winzes and rises are not to be considered shafts for the purpose of this report.
5.	In and at Shafts	.. Ropes and Chains breaking.	
6.	In and at Shafts	.. Whilst ascending or descending by machinery.	
7.	In and at Shafts	.. Falling into shaft from surface.	
8.	In and at Shafts	.. Falling from part way down.	
9.	In and at Shafts	.. Things falling from surface.	
10.	In and at Shafts	.. Things falling from part way down.	
11.	Miscellaneous below ground	Rock bursts.	
12.	Miscellaneous below ground	Suffocation by gases.	
13.	Miscellaneous below ground	Explosion due to misfire.	
14.	Miscellaneous below ground	By explosives (other than misfire)	
15.	Miscellaneous below ground	Falls of persons or things in Rises, Winzes and stopes.	
16.	Miscellaneous below ground	On inclined and engine planes. (Where the inclination of a shaft to the horizantal is not more than 308, it is to be considered an incline for the purpose of this report).	
17.	Miscellaneous below ground	By trams or tubs, but not on inclined and engine plane.	
18.	Miscellaneous below ground	By machinery.	
19.	Miscellaneous below ground	By other causes.	
20.	On surface	.. By machinery.	
21.	On surface	.. Bursting of Boilers and steam-pipes, etc.	
22.	On surface	.. On railways, tramways, or ærial ropeways belonging to mine.	
23.	On surface	.. Miscellaneous.	

(3) If on surface say so. All accidents on the surface works of the mine must be reported.

(4) If in a stope, state which stope, and whether on underhand or back stope. Also in what part of the stope.

(5) The twenty-four hours should be used as in railway time-table.

(6) If the person is a female, the fact should be noted in this column in addition to her occupation.

This report, after being filled in and signed by the Superintendent or other superior officer of the mine at the foot of page 2, should be folded and despatched forthwith to the Chief Inspector of Mines in Mysore, Oorgaum Post Office, K. G. F.

15 MAR 1930
GOVERNMENT FRANCE

N. Rama Rao, Esq., B.A., B.L.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Departments,
Bangalore.

Sir,

Adverting to correspondence ending with your letter No. D.9853/Geol. 151-26 dated 28-2-30, we have the honour to submit herewith, for the consideration of Government, a set of rules applicable to small mines worked on the open-cast system or by other methods. These rules have been framed following a comparative study of the rules obtaining in British India and other mining countries to suit local conditions. The revision of the rules for the grant of mining leases and prospecting licenses having also been taken in hand recently, an opportunity was provided to compare and discuss both sets of rules in their various aspects.

As the provisions of the rules framed under the Mysore Mines Regulation, IV of 1906, now in force, are somewhat elaborate and not easily applied to the working of small mines, the compilation of a separate set of rules has become necessary.

We have the honour to be,

Sir,

Your most obedient servants,

K. Boswell.
CHIEF INSPECTOR OF MINES
IN MYSORE

M. Sampathayya
DIRECTOR,
MYSORE GEOLOGICAL DEPARTMENT.

No. | Present Rule | Proposed Rule | Remarks.

Special Rules prescribed under Sections 21, 23, 27 of the Mysore Mines Regulation IV of 1906 for Small Mines.

I. Definitions.

Rule 1. (1) & (2) is new and is not to be found in the existing rules and may be retained.

II. Protection of the Surface.

II. Safety of Workings.

10 The sides of open workings shall be sloped, stepped or secured in such a manner as to prevent danger from falls of material, and no side shall be cut or worked so that any portion of it projects or overhangs.

2. Same rule except that the latter portion "and no side ..... projects or overhangs" is here omitted. For orders as to retaining this. (Rule 10 2nd wording might be retained)

3. This is a fresh rule and may remain. (should be made more definite. Safety must not be left in breadth)

In open workings, the overburden and all loose ground & materials shall be removed sufficiently far from the edge, or otherwise made secure to prevent danger to persons working in "open workings"

4. Rule 4 of new rules is the same as the present rule 9 with the words "trees liable to fall" inserted after the word. (Trees ... may be retained)

Present Rule	Proposed Rule	Remarks.
When any shaft, ~~or~~ trench or other excavation more than 10 feet deep, made in the course of mining operations, is or has been abandoned or the working thereof discontinued, at whatever time the abandonment or discontinuance occurs, the Mining Proprietor & every other person interested in the land in which such excavation is situated shall, without delay, either fill up such shaft, trench or other excavation, or protect the same by a substantial stone barrier on all sides at least 3 feet 6 inches high and 2 feet thick.	9. 5. The rule is the same except that ~~for~~ the word "shaft" in lines 1 & 9 is omitted and that instead of the words "the Mining Proprietor ..... is situated" in the existing rule is the words "the owner" are inserted in the proposed rule. — For orders.	I would add "or Manager" to fix the responsibility also on the man on the spot
Provided that this rule may be relaxed with the consent of an Inspector of Mines or of the District Inspector of the District in the case of an open working of which no side has a steeper slope than 45°; and which is not considered to be dangerous.	For Inspector of Mines in the existing rule the Chief Inspector of Mines is substituted in the new rule; and the words "which is not considered to be dangerous," the words "which in the Chief Inspector's opinion is not dangerous" are substituted. — For orders.	Leave to remain

Present Rule.	Proposed Rule.	Remarks.
In digging prospecting trenches, the materials excavated must be used to form approximately equal ridges on all sides. (10)	6. In digging prospecting & other trenches, pits or other excavations, a sufficient quantity of the removed ground shall be so disposed around the limiting boundaries of the opening that approximately equal ridges are provided on these boundaries and all necessary precautions shall also be taken (either by filling up or fencing the same) to prevent persons from inadvertently falling into or entering such trenches, pits or other excavations.	The rule has been considerably altered and may therefore remain May be retained
11. When any side ..... The same	7. B Rule 7 is the same as the old rule 11— For orders.	May be kept
12. Entrance to ..... barriers.	8. Rule 8 is the same as " " 12— For orders.	
	9. Rule 9 is a fresh rule and there is no old rule corresponding to it— may remain.	
	10. Rule 10 do ——— do	
	may remain.	

(4)

No.	Present Rule.	Proposed Rule.	Remarks.

III. Management.

Rules 11 to 14 under this head seem to be fresh ones. The words "owner of a mine" or "manager of the mine" are used in the new rules where the words "Proprietor, Agent or Sirdar" are used in the old rules. (vide Rule 221 of the old rules).

Rules 11 to 14 may therefore remain.

III. Workmen.

23. No person shall be employed underground on in attendance on machinery who is under the age of twelve years.

IV. Workmen.

15. No boys under the age of 12 years and no women shall be employed in the underground workings of a mine. The rule may therefore stand.

The new rule is slightly altered. For orders whether it may remain. Rule 15 remains

IV. Underground Workings.

The person in charge of a working place or place where men are stationed on pass, shall take all precautions to ascertain if the place is safe. If there is reason to

16. Every person in charge of a working party shall, before commencing work and during the course of it, especially after blasting, make a careful examination of his working place and remove any loose

The old rules are similar and so this may remain.

Present Rule.	Proposed Rule.	Remarks.
(8) To ~~believe~~ suppose that there is any danger to persons working, stationed, or passing therein, he shall proceed at once to remove the source of danger, etc., working place.	rock, stones or ground which might be dangerous.	As the new rule is different from the old one, it may remain. Proposed rule may be added

XIII. Explosives.

93 No explosives shall be stored in or about a mine except in accordance with the provisions of the Mysore Explosives Regulation & Rules, or as provided for in Rules 94 to 105 hereunder.

V. Explosives.

17. The storage of explosives and the use thereof shall be governed by the rules prescribed under the Mysore Explosives Regulation II of 1888 & of the Mysore Mines Regulation IV of 1906.

As the old rule is slightly changed in the new one, & the latter rule may remain.

XVII. Accidents, Ambulance, etc.

160 For the words "the Superintendent" in ~~Rule 160~~, and "an Inspector of Mines" in old Rule 160,

VI. Accidents.

18. The words "the Owner or Manager" and "the Chief Inspector of Mines" are used in the new rule 18.

For the last sentence "Where practicable, a brief notice of the accident shall also be sent by telegraph or telephone" of this rule, the following sentence "In cases of death, intimation shall also be sent to the Chief Inspector of Mines by telegraph" is inserted in this new rule for orders.

For the words "in accordance with the forms in the schedule to these rules" in the middle of this rule, the words "in accordance with Form I appended to these rules" are inserted.

Present Rules.	Proposed Rule.	Remarks.
161. By serious injury [illegible] in prolonged unconsciousness, or which may be declared to be serious by the Medical officer. (1)	19. New Rule 19 is the same as old rule 161 — For ordinary with the modification that the words "or enforced absence from work for 28 days" are inserted after the word "unconsciousness" and for "by the Medical officer" the in the old rule, the words "by any Medical officer" are used in the new one.	
162. For the words "the Superintendent" in this Rule, And for "the Inspector of Mines" at the end of the rule,	20. The words "the owner or Manager" are substituted in the new rule. The words "the Chief Inspector of Mines" are substituted.	For ordinary
163. 1st para. The place where an accident, etc., ... obtained. 2nd para. In the event of the Inspector of Mines being unable to proceed to the scene of the accident himself or to send a qualified deputy, etc For the words "the Inspector of Mines" at the end of this rule,	21. The new rule (21) is the same as the old rule 163. 22. The 2nd para of old rule 163 is inserted as new Rule 22 with the words (underlined) "to send a qualified deputy" omitted, and the words "the Chief Inspector of Mines" are inserted.	For ordinary

Present Rules.	Proposed Rule.	Remarks.
In all cases of accident, the proprietor shall arrange for medical assistance to be rendered to the injured as speedily as possible and shall make the following provision for persons employed in operations conducted under a mining lease, etc.,	23. In all cases of accident, the Owner or Manager shall arrange for medical assistance to be rendered to the injured as speedily as possible.	For orders as to whether this rule may stand (10)
XIX. Yearly Returns & Inspections.	VII. Yearly Returns & Inspections.	
181. The Supdt of a mine shall furnish to the Chief Inspector of Mines a statement showing the quantities of ore obtained and treated and the quantity of metal or other finished products obtained and other returns and statistics in such form and at such time as may be prescribed by the Govt.	24. The Owner or Manager of a mine shall forward monthly, complete and correct returns in the form prescribed so as to reach the office of the Chief Inspector of Mines not later than the 15th of each subsequent month.	The rules are different and the new style may therefore remains
182. When any working ... the Proprietor or his Agent or Superintendent shall immediately give written notice thereof to the Chief Inspector of Mines.	25. The rule is the same with the change of the words "Proprietor or his Agent or Supdt" into "Owner or Manager".	

Present Rule.	Proposed Rule.	Remarks.
184. In case of the abandonment of a mine, the Proprietor at the time of such abandonment, shall continue to be responsible for the carrying out of the rules regarding the protection of the surface under Section III, the furnishing of plans under Section XVIII, and the sending in of returns under Section XIX, until such rules have been complied with. Upon the Chief Inspector of Mines being satisfied that such rules have been duly complied with, he shall issue a certificate to that effect, and the Proprietor shall thereupon be relieved from all further responsibilities.	26. When the working of any mine is discontinued or abandoned, the owner or Manager of such mine at the time of its discontinuance or abandonment shall continue to be responsible for compliance with the requirements of the rules so far as the protection of the surface and the furnishing of plans & returns are concerned until the Chief Inspector of Mines shall have issued to him a certificate that such requirements have been complied with.	The two rules are different in wording — 7 orders.
185. For "An Inspector of Mines" in line 1 of the rule,	27. The words "The Chief Inspector of Mines" are substituted; and	
for "Proprietor, Agent & Engdt" in rule 185, ~~the words~~	the words "Owner or Manager" are used.	

Present Rule.	Proposed Rule	Remarks
185 (contd). The words within brackets in this rule, viz, (above or below ground), (and of the mines buildings mining metallurgical plant therein or thereon) & (with proper persons employed, etc ..... upon or within the mine effectually),	27. (continued)	Are omitted in the new rule 27. For orders
XVIII. Mine Plans.	**VIII. Plans.**	
171 & 172. "The general plan, etc.," and "Besides the general plan, etc.,"	Rule 28. "The owner or Manager shall keep in the office, etc., ... maintained" is different from the old rules 171 & 172.	may remain.
180. A true copy, etc., ... of the general plan of every underground plan or section refd to in Rules 170 & 172 shall be deposited etc., not every year but the Inspr,	New Rule 29, the underlined portion is changed into "of the plans sections refd to above" ..... "once every six months by the owner or Manager."	For orders.

Special Rules for Small Mines

Various alterations and suggested by the ~~various~~ ~~in the draft Rules~~

The words "All", "worked on the ~~open~~ cast system or by other methods" of the heading are proposed to be omitted.

(1) At the end of the rule the words "below the level of the pits mouth" are added. (13)

(2) Between the words "the" and "person" in line 1, the following words are inserted: — "owner, if he is himself in control of operations on the spot, or". ~~words~~ "of a small mine" at the end of the rule are omitted.

In line 2 in place of the word "sufficient" it is suggested that it "should be made more definite" after the word "occurs" at the end of line 4, the words "or may have occurred" have been inserted; and at the end of the rule instead of the words "is not considered to be" the words "in the Chief Inspector's opinion is not" are ~~to~~ inserted.

In the words "any sufficient means" in line 5 the words "all necessary precautions" are substituted; and in line 7, between the words "persons" and "inadvertently" the preposition "from" is inserted.

In line 5, the word "from" is inserted between "persons" and "inadvertently".

3 (a). for the words "period in excess of one month" in rule the words "longer period than one month" are substituted.

21. In the last but one line the word "thief" is omitted

37. This rule is proposed to be deleted.

Present Rule.	Proposed Rule.	Remarks
XXI. General Rules.	**IX. Miscellaneous.**	
195. For the word "Supdt" in this rule,	In new Rule 30, the words "the owner or the Manager" are substituted.	For orders
198. No person ..... in danger.	31. The new rule is the same as the old Rule 198.	For orders.
	32. This is a new rule.	
215. All workmen shall strictly adhere to these rules, & to any directions issued by the Supdt etc., for the guidance of the workmen.	33. The new rule is— "Every person shall strictly comply with all lawful orders issued by the owner, Manager or such other official as may be empowered by the Manager to issue the same.	The two rules are different & so the new rule may remain
210. If any person employed in a mine etc, a breach of these rules.	34. This rule is the same as old rule 210.	For orders.
	X. General.	
211. Any person ..... these rules.	35. This is the same as old Rule 211.	
~~New~~ Rules	36 & 37 are new & may therefore stand.

EXPLANATIONS.

(1) Notices of all accidents as required by Rules ~~160~~, ~~161~~, ~~162~~ and ~~165~~ 18, 19 and 20 must be furnished on the above form.

(2) Insert numbers corresponding to the following classes.—

1. Falls in mine.—Falls of hanging-wall.
2. Falls in mine.—Falls of sides or roof.
3. Falls in mine.—Falls of ore from working places.
4. In and at shafts.—Overwinding.
5. In and at shafts.—Ropes and chains breaking.
6. In and at shafts.—Whilst ascending or descending by machinery
7. In and at shafts.—Falling into shaft from surface.
8. In and at shafts.—Falling from part way down.
9. In and at shafts.—Things falling from surface
10. In and at shafts.—Things falling from part way down.

(Winzes and rises are not to be considered shafts for the purpose of this report.)

11. Miscellaneous below ground.—Rock-bursts.
12. Miscellaneous below ground.—Suffocation by gases.
13. Miscellaneous below ground.—Explosion due to misfire.
14. Miscellaneou below grouna.—By explosives (other than mifire).
15. Miscellaneous below ground.—Falls of persons or things in Rises, Winzes and Stopes.
16. Miscellaneous below ground.—On inclined and engine planes. (Where the inclination of a shaft to the horizontal is not more than 30°., it is to be considered an incline for the purpose of this report.)
17. Miscellaneous below ground—By trams or tubs, but not on inclined and engine planes.
18. Miscellaneous below grouud.—By machinery.
19. Miscelianeous below ground.—By other causes.
20. On surface,—By machinery.
21. On surface.—Bursting of boilers and steam pipes, etc.
22. On surface.—On railways, tramways, or aerial ropeways belonging to mine
23. On surface.—Miscellaneous.

(3) If on surface, say so. All accidents on the surface works of the mine must be reported.

(4) If in a stope, state which stope, and whether on underhand or back stope. Also in what part of the stope.

(5) The twenty-four hours should be used as in railway time table.

(6) If the person is a female, the fact should be noted in this column in addition to her occupation.

This report, after being filled in and signed by the Superintendent or other superior officer of the mine at the foot of page 2, should be folded and despatched forthwith to the Chief Inspector of Mines in Mysore, Oorgaum Post Office, K. G. F.

Adverting to your letter No. 1604-M

11/12.3.30 submitting for the consideration of Govt a set of rules applicable to Small Mines I am directed to enquire what are the returns that have been prescribed by Govt under the Mysore Mines Regulation IV of 1906 and the Rules issued thereunder and in what forms they have been prescribed. In this connection I am to point out that these proposed rules should be complete in so far as Small Mines are concerned and that if the intention is to require the submission of

2

of the same returns as are prescribed for Big Mines this point has to be made clear. If however simpler forms will do, it is necessary to state in the rules in this regard, what returns the Small Mines should submit and in what form. ~~they should be submitted I am further to inquire where what~~ I am also to enquire where under sec 34 & 35 penalties for breaches of the rules have been prescribed and to state that the following changes are proposed to be made in the draft rules:—

1) In Rule 36 the portion "Whenever the vertical depth of a Small mine exceeds 150 ft or" is proposed to be omitted as it is unnecessary in view of the definition of a small mine in the preamble and the point that the other General Rules apply to Big mines has to be mentioned therein. For "such" in line four the words "a Small" are proposed to be inserted & the words "then existing" in the same line deleted.

2) In Rule 37 it is proposed to insert the clause "Where working is considered unsafe by an officer of the Govt Dept" between "mine" & "should" in line 3.

I am to enclose a copy of the printed Rules for your use & request you to be so good as to furnish information on the points mentioned above & to state whether you are agreeable to the modifications proposed. The favour of an early reply in the manner is requested I have etc,

Bangalore.

RULES FOR SMALL MINES.

Sir,

With reference to your letter No. D.4797/Geol. 109-29-8 dated 19th March 1932 enquiring what returns are required to be submitted by the Mine Owners under the Rules for Small Mines and in what form, etc., I have the honour to state that the only return that is specifically provided for submission in the case of Small Mines is a monthly return of output of minerals - vide Rule 24. In addition to this, the Mine Owners are required to submit annually Schedule of Mining Work, etc. The forms for these two returns are prescribed departmentally, and are enclosed herewith for the information of Government. As these forms are subject to revision from time to time, it is not advisible to incorporate them in the rules.

In the case of big Mines the provision made in the rules regarding Government Returns is described in general terms - vide Rule 181. As it is not possible to foresee all the returns that may be necessary to call for from the Small Mine Owners under the statutory provisions of the Rules, it is suggested that Rule 24 of the Small Mines Rules may be amplified as follows:-

Rule 24:-

The Owner or Manager of a Mine shall

furnish

furnish to the Chief Inspector of Mines a monthly statement shewing the quantities of ore obtained and treated or the quantity of metal or finished products obtained, or ore exported or utilised and other returns and statistics in such form and at such time as may be prescribed by him.

As regards penalties for breaches of rules, provision exists in Sections 24 and 33 of the Mysore Mines Regulation and the same may be made applicable here by the addition of the two following rules numbered as 38 and 39 under Section X General:-

Rule 38:-

All workmen shall strictly adhere to these rules and to any directions issued by the Owner or Manager with a view to their safety or proper convenience of the mine, not being inconsistent with these rules. Any infringement thereof shall be punishable under Sections 24 and 33 of the Mysore Mines Regulation, IV of 1906.

Rule 39:-

If any mine is worked in a manner, which though not expressly forbidden by the provisions of these rules, is nevertheless dangerous, the Chief Inspector of Mines may require the matter to be remedied and failure on the part of the Owner or Manager of such Mine to comply with such requisition will amount to a breach of these rules.

I have the honour to be,

Sir,

Your most obedient servant,

C E Srinivasamurthy

Proceedings of the Govt. of H.H.
the Maharaja of Mysore.

Geol 102-29-7

Read--

Letter No.1604 Dated 12-3-30 from the Director of Geology and the Chief Inspector of Mines submitting for the consideration of Govt a set of rules applicable to Small Mines worked on the open cast system or by other methods and stating that these rules have been framed following a comparative study of the rules obtaining in British India and other mining Countries so as to suit local conditions and to meet practical difficulties and that the compilation of a separate set of rules has become necessary as the provisions of the rules framed under the Mysore Mines Regulation IV of 1906 are somewhat elaborate and not applicable to Small Mines.

2. Correspondence ending with letter No. 1782 dated 29th March 1932 from the Chief -- Inspector of Mines furnishing his views on -- certain points:-

---

Order, No. D. 663-31

Dated, Bangalore 28th June 1932.

Govt. are pleased to approve of the set of special rules framed for Small Mines by the -- Director of Geology and the Chief Inspector of Mines with a view to prevent mining accidents and ensure the safety of persons employed in or about the mines and to direct that they be published in the Mysore Gazette. A separate Notification will be issued in this behalf.

2. The ~~present~~ General Rules published under General Notification No.Geol.444 dated

22-8-11 will in future apply only to Mines other than small mines to which the Special Rules now proposed will be applicable.

Secretary to Government,
Development Department.

To

The Chief Inspector of Mines in Mysore.

The Director of Geology in Mysore.

Two drafts-
